

**MULTIFUNCTION HANDLE FOR A REMOVABLE STORAGE OR OTHER
REMOVABLE COMPUTER DEVICES**

ABSTRACT OF THE DISCLOSURE

5 A removable device, such as a removable mass storage device, includes a
multifunction handle coupled to the device. The multifunction handle includes a
force-developing portion and includes an interlock portion adapted to be engaged
by an interlock component. The handle develops an insertion force at the force-
developing portion responsive to a force applied to the handle, and also secures
10 the removable device in a desired position to prevent use of the handle responsive
to the interlock portion being engaged by the interlock component.
